### **DETAILED ACTION**

The receipt of Information Disclosure Statements dated 9/2/05, 5/2/06, and 6/15/06 is acknowledged.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 6, 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Bombardelli et al EP0300282 (Bombardelli). The reference is provided by Applicant in Information Disclosure Statement dated 6/15/06.

Bombardelli teaches topical pharmaceutical or cosmetic compositions having eutrophic and cutis protecting activities, based on complexes of silybin, silydianin, silychristin or mixtures thereof with vegetal or synthetic phospholipids. The reference discloses that the complexes, or those obtainable from *Silybum marianum* extracts, may be advantageously used in topical pharmaceutical or cosmetic compositions, useful to counteract degenerative and aging phenomena (page 2, line 9+). The silymarin is used in an amount encompassed by the range recited in claim 6 of 0.7-2.00% (see preparations, page 1 and 2).

#### ***Claim Rejections - 35 USC § 103***

Art Unit: 1618

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bombardelli et al EP0300282 (Bombardelli) in view of Sekimoto US 6814958 (Sekimoto).

Art Unit: 1618

Bombardelli is discussed above.

Sekimoto teaches food composition comprising silymarin (abstract and claims 1, 5, 7 and 9). Note that the intended use of the claimed composition has not been given patentable weight, because the prior art compositions would be at least capable of performing said use.

Accordingly, it would have been obvious to one of ordinary skill in the art at the time the invention was made to combine Bombardelli and Sekimoto to facilitate the intake of the silymarin as some people prefer to use active in agents over pharmaceutical dosage forms. The expected results would be a topical cosmetic or food preparation comprising silymarin, which is used for anti-aging purposes.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nabila G. Ebrahim whose telephone number is 571-272-8151. The examiner can normally be reached on 8:00AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Hartley can be reached on 571-272-0616. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
